We create champions.

 English

900 ALU

THE NEW AGE OF SPORT SHOOTING!

Sophisticated technical features and a clear, timeless design are combined in the new 900 model series from Feinwerkbau.

CONVINCING PRODUCT FEATURES

- ✓ The further developed, adjustable absorber unit enables an individual pulse adjustment to the personal needs of the shooter.
- ✓ The Model 900 can be conveniently reloaded - more space for easy pellet insertion.
- ✓ The revised trigger unit has been optimized in terms of force distribution and consists of high-precision components made of HSS steel.
- ✓ The maintenance-free pressure reducer has been redesigned for even smoother system operation and ensures significantly reduced noise during firing.
- ✓ The optimized system bedding with double barrel clamping ensures highly precise groupings.
- ✓ The latest grip adjustment from Feinwerkbau enables almost all desired settings to be made.
- ✓ The sliding prism clamping of the Vario sight allows quick assembly and disassembly of the complete rear sight and is thus ideal for protecting sensitive attachments during transport.

900 ALU SILVER

AVAILABLE OPTION
900 ALU BLACK

Design meets precision.

High-quality components combine to create a high-precision air rifle.

A wide range of adjustment options ensure optimum ergonomics.

This creates a new pacesetter in the field of match air rifles!

Cheek Piece
can be moved laterally via fine adjustment in the aiming position - reaction to changed conditions at the shooting range is possible without loss of time

Further developed absorber unit
for individual pulse adjustment

Match-Diopter
swiveling, mounted on a sliding and removable prismatic clamp

Cocking lever
can be swiveled and rotated 360°, can be mounted on right or left side

Maintenance-free pressure reducer
with reduced noise for even more constant system function

optimized system bedding

more space for easy pellet insertion

continuous T-slot rail in the aluminum front stock

Hand rest
height adjustable, swiveling, length adjustable

revised Match Trigger
made of HSS components with excellent kinetic properties

Anatomically shaped 3D handle
made of beech wood. Three-dimensionally adjustable, longitudinally and laterally adjustable, available in sizes S, M and L

Buttstock
can be easily and reliably set. Adjustment mimic can be converted from right to left (and vice versa) without tools

Butt Plate X-Line

BASIC TECHNICAL DATA

Total Weight Approx.	4.5 kg
Total Length Approx.	1,042 - 1,170 mm
Sight line length	610 - 970 mm
Stock length	745 - 820 mm
Trigger weight	30 - 160 g / 80 - 250 g
Length of pull	275 - 360 mm

900 ALU - BENCH REST SILVER

AVAILABLE OPTION
900 ALU - BENCH REST BLACK

Even in the bench rest version, the 900 model series impresses with quality, functionality and precision. A match air rifle that meets all the requirements of this in this demanding discipline – without compromise!

raised Cheek Piece for benchrest shooting can be moved laterally via fine adjustment in the stop - reaction to changed conditions at the shooting range is possible without loss of time

Sliding prism clamping allows quick mounting and dismounting of the complete sight unit and is thus ideal for protecting sensitive attachments during transport

Cocking lever can be swiveled and rotated 360°, can be mounted on right or left side

more space for easy pellet insertion

optimized system bedding

Buttstock can be easily and reliably set. Adjustment mimic can be converted from right to left (and vice versa) without tools

revised Match Trigger made of HSS components with excellent kinetic properties

special wooden support bar steplessly inclinable, longitudinally slidable

Butt Plate X-Line

Anatomically shaped 3D handle made of beech wood. Three-dimensionally adjustable, longitudinally and laterally adjustable, available in sizes S, M and L

Ideal for benchrest shooters:
Also available with left-hand system in the right-hand stock (and vice versa) – this allows comfortable reloading in benchrest shooting!

BASIC TECHNICAL DATA

Total Weight Approx.	4.7kg
Total Length Approx.	1,042 - 1,170 mm
Sight line length	610 - 970 mm
Stock length	745 - 880 mm
Trigger weight	30 - 160 g / 80 - 250 g
Length of pull	275 - 360 mm

900 ALU - HYBRID SILVER

The ideal companion for those who compete in both freehand and benchrest disciplines in shooting sports. One model – two uses!

AVAILABLE OPTION
900 ALU - HYBRID BLACK

raised **Cheek Piece** for benchrest shooting can be moved laterally via fine adjustment in the stop - reaction to changed conditions at the shooting range is possible without loss of time

11 CHAMPAGNE

12 TITANIUM

13 BROWN

PLEASE NOTE:

- The delivery time for individualized models may be longer.
- Due to technical reasons, slight color deviations are possible.
- For printing reasons, the colors shown here are not binding, but serve only as an indication of the respective colors.
- The individualized models are order-related special productions - exchange, return, etc. are therefore excluded.

EVEN MORE INDIVIDUALIZATION EX WORKS? NO PROBLEM WITH FEINWERKAU!

CENTRA PRECISION SIGHTING

On request, we deliver the 900 model series ex works with Centra precision sights. The Centra "SPY-long" sight (or "SPY BR" for benchrest rifles) is extremely narrow and compact in design and allows ideal space acquisition for balanced standing freehand and on the bench. The "SPY" series of sights are ideal for shooting in windy conditions and are equipped with a backlight aperture that can also be used as a carrier element for the "Duplex".

The "SPY-long" sight has 24 clicks (approx. 0.2 mm per click at 10 m), the "SPY-BR" has 48 clicks (approx. 0.1 mm per click at 10 m). In addition, the front sight "Centra Score" (or "Centra Score Plus" for benchrest rifles) M22 with a clear front sight is also included. This can be swiveled steplessly around its own axis without tools and enables a pleasantly elegant target image.

GRIPS, CHEEK PIECE AND HAND REST "MESHPRO"

MeshPro grips are not only a real eye-catcher, they also offer the user clear advantages over conventional grips. Due to the grid structure (mesh) produced in the additive manufacturing process, material and thus weight is saved. In addition to maximum stability, this mesh structure also ensures permanent ventilation of the grips.

The grips are available as right or left version in sizes S, M or L. Already ex works, with the option "MeshPro", you can order your sporting rifle with the set of grip, cheek piece and hand rest in this revolutionary mesh structure on request.

HOW DO I ORDER MY DESIRED MODEL?

Use the product configurators on the following pages to select your favorite from all available options. Complete the order number of your desired model step by step. With this order number, your dealer can order your individual sporting rifle directly from Feinwerkbau.

SYSTEM VARIANT

Here you can decide on which side the cocking lever of your desired model is mounted. Our tip: For convenient reloading, benchrest shooters can order a left-hand system in the right-hand stock.

COLOR

You can choose from our standard silver or black colors and 13 custom colors for an additional charge.

ATTACHMENTS

Here you can select your desired grip size and whether you want grip and cheek piece made of beech wood with black grip lacquer and the hand rest made of Aluminum (series) or in the version with grid structure "MeshPro". Furthermore, for the 900 Alu benchrest model, you can choose whether you want the grip bar (art. no. 3.2.226.580) in addition to the beech wood support bar for even more comfortable positioning of the support hand.

SIGHTS

Choose between the Feinwerkbau standard sights or the Centra "SPY" diopter (or "SPY BR" in the benchrest version) and the "Centra Score" front sight tunnel (or "Centra Score Plus" in the benchrest version) or order your model without sights.
